WHAT'S UP

THREE STEPS TO ACNE-FREE SKIN

The Proactiv+ 3-Step Clear Skin System is now available at Watsons and SM Department stores nationwide.

It has Smart Target technology that delivers acne-fighting formulation directly

into the pores.

The three-step system starts with a Smoothing Exfoliator facial cleanser, which removes excess dirt and other impurities. The second step is called the Pore Targeting

treatment. It stops the acne at the source, because it delivers blemish-fighting ingredients directly into the pores. The final process hydrates the skin with the Complexion Perfect Hydrator.
