

## MALAYA BUSINESS INSIGHT

May 9, 2016

### Enjoy the scorching hot summer with your best skin companion

YOU want to head off to the beach and frolic together with friends or your loved ones but you're afraid.

What's your effective battle plan to counter any possible acne breakouts while you enjoy the season? Protect yourself this early before basking in the glory of the summer sun and prevent acne breakouts from happening by using America's Number One acne treatment system—Proactiv Solution!

Proactiv Solution, offers a 3-Step

System developed and recommended by dermatologists. This skin care regimen helps clear existing acne and prevents future outbreaks while gently taking care of the skin.

You'll be glad to note as well that Proactiv is absolutely safe. Each Proactiv Solution set contains only 2.5% of BPO, which is lower than other over-the-counter acne treatments so you can feel at ease even if you use it daily. What BPO does is that it breaks down into benzoic acid and oxygen, and the oxygen

acts as a free radical that destroys the cells that block the pores along with the bacteria growing on it. BPO, at this concentration level, can already effectively prevent acne breakouts on the skin so there's really no cause for worries at all.

Come on, enjoy the sun and the shade as well without any worries, for you don't have to think of acne breakouts since you have Proactiv Solution by your side. And that's a guarantee no other acne treatment solution can promise.
